

March 19 2018 Meeting

Name: Andrew Grillot

1. What have you completed since the last meeting?
Figured out more Django. Understood server and backend material.
2. What will you complete before the next meeting?
Integrate everyone else's code, somehow figure out how to incorporate username and password system into project.
3. Describe any obstacles or roadblocks you face.
Learning more about databases. Learning more html and python request systems.

Name: Michael Gigiolio

1. What have you completed since the last meeting?
Completed a login page and system.
2. What will you complete before the next meeting?
Complete user registration system.
3. Describe any obstacles or roadblocks you face.
Integrating SQL server.

Name: Maxim Moghadam

1. What have you completed since the last meeting?
Have finished the twitter sentiment analysis program and worked with Bayesian classification to find words predictive of positive or negative sentiment
2. What will you complete before the next meeting?
Will work on using flask to integrate the html page to an sql database
3. Describe any obstacles or roadblocks you face.
Using flask will be difficult to figure out, as integrating the database to the frontend

Name: Juan Fran Ferrer

1. What have you completed since the last meeting?
Found out it was going to be too hard to do natural language processing by recommendation of the TA and learned about Web-Scraping.
2. What will you complete before the next meeting?
I'm going to help Max learning how to use Flask
3. Describe any obstacles or roadblocks you face:
Natural language processing was too hard to complete in the time given.

Name: Stacy Hayes

1. What have you completed since the last meeting?
Researched potential html/css templates for the front-end.
2. What will you complete before the next meeting?
Finalize front-end from template.
3. Describe any obstacles or roadblocks you face.
Integrate front-end with username/password system and database.
