

Name: Jonathan Bayer

1. What have you completed since the last meeting?

Completed milestone 4, researched methods of improving bot detection performance

2. What will you complete before the next meeting?

Bot detection algorithm that runs quickly and (somewhat) effectively, link bot detection, twitter sentiment, and seeking alpha sentiment

3. Describe any obstacles or roadblocks you face.

Bot detection is **stupid** and **dumb**

Name: Andrew Grillot

1. What have you completed since the last meeting?

Integrated my program and database to flask.

2. What will you complete before the next meeting?

Try to figure out how to create active user system that stores searches to their respective user ID in database

3. Describe any obstacles or roadblocks you face.

Understanding how an active user system works at all in flask

Name: Stacy Hayes

1. What have you completed since the last meeting?

Worked on the project website.

2. What will you complete before the next meeting?

Make more progress on project website. Hopefully get close to finalizing it.

3. Describe any obstacles or roadblocks you face.

I have a lot homework and tests coming up so finding time to work on this will be difficult.

Name: Juan Ferrer

1. What have you completed since the last meeting?

Pushed into github some changes and been researching website templates

2. What will you complete before the next meeting?

Will be helping Stacy with the website

3. Describe any obstacles or roadblocks you face.

It's hard to manage my time with the project and other homework that I have to do.
