Name: Stacy Hayes

1. What have you completed since the last meeting?
   - I have worked on fine-tuning the frontend.
2. What will you complete before the next meeting?
   - Have the frontend finalized.
3. Describe any obstacles or roadblocks you face.
   - Shifting the mysql/frontend integration to the new webpage.

Name: Maxim Moghadam

1. What have you completed since the last meeting?
   - Finished integrating html web page with sql database for user info (name, email, pw)
2. What will you complete before the next meeting?
   - Will integrate the twitter sentiment analysis program with the bot detection program and alter program to return a single sentiment score for each query.
3. Describe any obstacles or roadblocks you face.
   - It's very difficult to combine code from multiple people to form a succinct and well-behaved program. It'll be a challenge to integrate the bot detection program that I did not write with the sentiment analysis program that I did write.

Name: Michael Gigiolio

1. What have you completed since the last meeting?
   - Small UI updates to some web pages
2. What will you complete before the next meeting?
   - Determining functionality
   - Fixing performance issues
3. Describe any obstacles or roadblocks you face.
   - Myself

Name: Jonathan Bayer

1. What have you completed since the last meeting?
   - Updated bot detection method with database
2. What will you complete before the next meeting?
   - Database ER Diagram
   - More performance improvements to bot detection - researching and implementing

3. Describe any obstacles or roadblocks you face.
- Bot detection is inherently time consuming without making shortcuts

Name: Juan Fran Ferrer
1. What have you completed since the last meeting?
I've been learning about flask and how to apply it to our project, to be able to login into the program
2. What will you complete before the next meeting?
Improve the webpage
3. Describe any obstacles or roadblocks you face.
 Some minor errors trying to run flask

Name: Andrew Grillot
1. What have you completed since the last meeting? Learned that we should abandon django for flask
2. What will you complete before the next meeting? My webscraping program will be integrated into flask
3. Describe any obstacles or roadblocks you face. Learning the syntax and platform format.
